Year 1 – Maths

Place Value
Children need to understand to value of each digit in a 2-digit number (e.g. 32 – where 3 means 30 and 2 means 2).

They need to know how many tens and ones are in each number.

Please follow this link to our Launchpad for activities to help your child with place value:

Year 1 Launchpad - Mathematic Activities

Questions for your child about 2 digit numbers
Give an example of a 2 digit number and ask them:

↳ What is one more and one less than a number?

↳ Is the number odd or even?

↳ Can you tell me a number which is less than _____?

↳ Can you tell me a number which is more than _____?

↳ Can your child compare numbers? Ask your child to order numbers from smallest to greatest or greatest to smallest
 (e.g. 22, 18, 29 = 18, 22, 29)

↳ Is the number in the 2 times table?

 ↳ Why? (the number ends in a 0, 2, 4, 6 or 8)

↳ Is the number in the 5 times table?

 ↳ Why? (the number ends in a 0 or 5)

↳ Is the number in the 10 times table?

 ↳ Why (the number ends in a 0)

Please find a way to record this in your child's workbook at home.
