

Teaching The Importance of Good Dental Health

The Nottingham Oral Health Promotion Team are delivering free Oral Health Training via three small modules. The modules will link to the 2020 RSE and Health Education Curriculum.

Each session will include:

- ✓ a 30-minute live tutorial
- ✓ a 30- minute task sheet
- ✓ a range of free teaching resources
- ✓ a certificate (*1-hour learning*)

Teaching The Importance of Good Dental Health

Course Outline

Session Description

These virtual modules are delivered by the Nottingham Oral Health Promotion Team and have been created to support teaching staff working with children to promote oral hygiene and dental access in relation to 2020 RSE and Health Education Curriculum.

Training Aims

These sessions aim to empower teaching staff with the knowledge and practical skills to teach dental health in a variety of formats.

Target Audience

This course is aimed at any teaching staff working with children. Examples include NQT, RQT, teachers, support staff and teacher training students.

Learning Outcomes

By the end of the sessions you should:

- ✓ Have a greater understanding of dental health.
- ✓ Understand the importance of effective oral hygiene, regular dental access and healthy eating.
- ✓ Feel more equipped to support children in the classroom.

Teaching & Learning Strategies

This is an interactive course that uses an array of teaching styles to encourage discussion, reflection and understanding.

Booking Details

For further information and booking please contact the Oral Health Promotion Team on 0115 8760136.

Duration

Each module equates to 1 hour of learning. A 30-minute virtual session and a 30-minute task sheet post session.
